Early Life and Diagnosis

Carly was born on a crisp autumn day in a small town nestled amidst rolling hills. As a toddler, she exhibited signs of developmental delays compared

to her peers. Difficulty engaging in social interactions, repetitive behaviors, and intense sensory sensitivities raised concerns among her parents.

After a thorough evaluation, Carly was diagnosed with autism spectrum disorder (ASD). This diagnosis marked the beginning of a new chapter in the lives of Carly and her family. Determined to provide her with the best possible support, her parents embarked on a quest for resources and therapies.
