Summary

The book is divided into four parts:

1. **The Personal is Political:** This section explores the ways in which personal experiences are shaped by gender and politics. Solnit writes about her own experiences with sexual assault and domestic violence,

and she argues that these experiences are not isolated incidents but are part of a larger system of oppression.

2. **The Public is Personal:** This section focuses on the ways in which public policies and institutions affect women's lives. Solnit writes about topics such as reproductive rights, childcare, and economic inequality, and she argues that these policies are not neutral but are designed to maintain the status quo.
3. **The Future is Female:** This section looks at the challenges and opportunities facing feminists in the 21st century. Solnit writes about the rise of the #MeToo movement, the increasing visibility of LGBTQ+ people, and the growing awareness of intersectionality. She argues that feminism is more necessary than ever before, and she believes that feminists can create a more just and equitable world.
4. **Epilogue: A Call to Action:** In the epilogue, Solnit calls on feminists to take action to create a better world. She argues that feminists need to be more visible, more vocal, and more united. She also calls on feminists to build alliances with other social justice movements, such as the LGBTQ+ rights movement and the Black Lives Matter movement.

Themes

Here We Are addresses a number of important themes, including:

- **Rape culture:** Solnit argues that rape culture is a pervasive problem in our society, and she calls on feminists to work to end it.
- **Reproductive rights:** Solnit believes that women have the right to control their own bodies, and she supports the right to abortion.

- **Economic inequality:** Solnit argues that economic inequality is a major feminist issue, and she calls on feminists to work to create a more just economy.
- **Intersectionality:** Solnit argues that feminism must be intersectional, meaning that it must take into account the ways in which gender intersects with other forms of oppression, such as race, class, and sexual orientation.
